Professional Summary

Infrastructure-focused **Network Engineer and Team Lead** with 3+ years of experience in enterprise network operations, system administration, hardware troubleshooting, server infrastructure, and IT operations. Experienced in supporting high-density environments with **1,300+ systems**, monitoring servers, network racks, uplinks, and infrastructure components, and troubleshooting hardware, software, and network issues. Hands-on experience with Cisco and Brocade switching, VLANs, TCP/IP, LAN troubleshooting, Sophos security infrastructure, Active Directory, Linux servers, monitoring tools, ticket-based incident management, SLA adherence, and technical documentation. Strong focus on systematic troubleshooting, infrastructure availability, operational reliability, and root-cause analysis.

Core Competencies

- **Data Center Operations:** Server Infrastructure, Rack Monitoring, Infrastructure Availability, Hardware Troubleshooting, Hardware Break/Fix Fundamentals, Asset Management, Preventive Maintenance
- **Networking:** TCP/IP, VLAN, DHCP, DNS, VPN, Cisco Switching, Brocade Switching, Routing, LAN Troubleshooting, Network Connectivity
- **Systems:** Linux Administration, Windows Server, Active Directory, Group Policy, SSH, Apache, SMB, System Troubleshooting
- **Operations:** Incident Management, Ticket Lifecycle, SLA Adherence, Escalation, Root-Cause Analysis, Change Management, SOPs, Technical Documentation
- **Security:** Sophos Firewall, Endpoint Protection, Access Control, Network Security, Security Policies, VAPT

Professional Experience

TasksEveryDay | TeamsPH

Remote, USA & Philippines

Network Engineer – Team Lead

July 2025 – Present

- Led a team of network and IT support engineers, standardizing incident response, ticket handling, escalation workflows, and performance tracking to improve SLA compliance.
- Oversaw multi-location network and VPN infrastructure across the USA and Philippines, monitoring availability and troubleshooting connectivity issues to maintain reliable remote operations.
- Managed firewall policies, endpoint security, and access controls using Sophos and Active Directory while supporting secure and reliable infrastructure operations.
- Administered Microsoft 365 and Google Workspace, managing user access, policy configuration, and operational support activities.
- Implemented endpoint browser policies and standardized configurations across distributed user environments to improve operational consistency and security.
- Led infrastructure upgrades, created operational procedures, and coordinated with stakeholders and external vendors to resolve technical issues and maintain service continuity.

Alfa KPO

Mumbai, India

Network Engineer

July 2024 – August 2025

- Managed and troubleshot enterprise network infrastructure, maintaining **99.9% uptime** and reducing unplanned downtime by 15% through proactive monitoring and troubleshooting.
- Configured and supported VLANs, IP addressing, routing, and Layer 3 switching across Cisco and Brocade network infrastructure.
- Diagnosed network connectivity issues using monitoring tools, firewall logs, interface information, and structured troubleshooting methodologies.
- Implemented and administered Sophos Firewall and Endpoint Protection, supporting secure and reliable enterprise infrastructure operations.
- Administered Active Directory, including user access, Group Policy, permissions, and account management.
- Conducted periodic Vulnerability Assessment and Penetration Testing (VAPT), documenting findings, mitigating security risks, and generating compliance reports.
- Developed 15+ network and infrastructure SOPs covering maintenance, troubleshooting, disaster recovery, and operational procedures.

Alfa KPO

Mumbai, India

IT Executive

June 2023 – July 2024

- Supported a high-density enterprise environment of **1,300+ systems**, troubleshooting hardware, software, peripheral, and network issues to maintain operational availability.
- Monitored server infrastructure, network racks, uplinks, and connected infrastructure to identify connectivity and infrastructure issues and help prevent service interruptions.

- Troubleshoot LAN infrastructure and network bottlenecks using SNMP monitoring tools, network diagnostics, and firewall logs.
- Performed structured incident troubleshooting and resolution through a ticket-based support environment using Zoho Desk, maintaining timely response and escalation.
- Supported enterprise email infrastructure including Outlook, POP/IMAP/SMTP, Exchange, and domain configurations.
- Maintained CCTV, DVR, and alarm systems while following organizational physical security and operational procedures.

Education

Thakur College of Engineering and Technology

B.E. in Computer Engineering | CGPI: 7.03

Mumbai, India

Aug 2016 – July 2021

JSpiders

Java FullStack Development

Bangalore, India

Thakur Vidya Mandir Jr College

HSC in Science

Mumbai, India

May 2014 – Feb 2016

Technical Projects

Enterprise-Grade HomeLab Environment

Self-Hosted

Systems Administrator

- Architected and administered a Linux-based server environment with network routing, switching, secure SSH access, and self-hosted infrastructure services.
- Deployed and maintained Apache Web Server, Nextcloud file services, SMB network file sharing, and Jellyfin across self-hosted infrastructure.
- Configured network services, storage, access controls, and local Quality of Service while troubleshooting Linux, network, and service availability issues.

Mattermost Chat Application

Open Source

Lead Deployment Engineer

- Deployed and maintain Mattermost on a Linux server, managing application availability, secure administration, and internal user access.
- Integrated the application with existing infrastructure and maintained secure communication and administrative controls.

Inventory Management System

PHP & JavaScript

Developer

- Developed an asset tracking system to manage hardware assignments and streamline equipment maintenance workflows.
- Improved IT asset management efficiency by **25%**, helping reduce hardware loss and improve equipment accountability.

Custom Password Manager

Self-Hosted

Security Implementation

- Designed and deployed a self-hosted password management solution using AES-256 encryption and role-based access control for secure credential management.

Technical Skills

- **Data Center & Hardware:** Server Infrastructure, Hardware Troubleshooting, Hardware Diagnostics, Network Racks, Rack Infrastructure Monitoring, Asset Management, Infrastructure Availability
- **Networking:** TCP/IP, VLAN, DHCP, DNS, VPN, QoS, Cisco Switching, Brocade Layer 3 Switching, Routing, LAN Troubleshooting, Network Monitoring
- **Linux & Systems:** Linux Server Administration, SSH, Apache, SMB, Windows Server, Active Directory, Group Policy, User & Access Management
- **Security:** Sophos Firewall, Endpoint Protection, Access Control, Network Security, Security Policies, VAPT, System Hardening
- **Monitoring & Operations:** SNMP, Domo, Zoho Desk, Incident Management, Ticket Lifecycle, SLA Management, Escalation, Root-Cause Analysis
- **Automation & Scripting:** PowerShell, Bash, Task Automation
- **Cloud & Platforms:** AWS EC2, Microsoft 365, Google Workspace, Basic Cloud Networking
- **Infrastructure:** Virtualization, Backup & Recovery, VoIP, CCTV Systems, High Availability
- **Programming & Tools:** Git, Python, Java
- **Languages:** Native Hindi | Fluent English | Familiar French

Certifications & Professional Training

- **AWS Certified Cloud Practitioner** (In Progress) – Focusing on IAM, EC2, VPC, and Cloud Security.
- **Cisco Certified Network Associate (CCNA)** (In Progress) – Emphasizing OSPF, VLAN routing, and network automation.
- **Enterprise Security Training:** Hands-on administration of Sophos XG Firewalls and Zero-Trust implementation.
