Professional Summary

Results-driven **Network Engineer and Team Lead** with 3+ years of experience in enterprise network infrastructure, system administration, and security. Experienced in managing Cisco networks, Sophos Firewall, Active Directory, VLAN, VPN, and monitoring systems, ensuring high availability and performance. Skilled in Microsoft 365, Google Workspace, and endpoint policy management, with a focus on access control, compliance, and security. Hands-on exposure to cloud platforms (AWS EC2), automation using PowerShell, and basic Linux administration, with a growing focus on infrastructure automation and modern IT practices.

Operational Leadership & ITSM

- **IT Service Management (ITSM):** Proficient in managing ticket lifecycles, SLA adherence, and escalation matrices using enterprise helpdesk tools (Zoho Desk).
- **Team Leadership:** Directed daily operations for cross-functional IT support teams, conducting performance tracking and mentoring junior engineers.
- **Documentation & Compliance:** Authored 15+ Standard Operating Procedures (SOPs) for network maintenance, disaster recovery, and hardware troubleshooting.

Professional Experience

TasksEveryDay | TeamsPH

Network Engineer – Team Lead

Remote, USA & Philippines

July 2025 – Present

- Led a team of network and IT support engineers, standardizing incident response and managing performance tracking to improve SLA compliance
- Oversaw multi-location VPN and network infrastructure across the USA and Philippines, ensuring high availability and reliability for remote operations
- Managed firewall policies, endpoint security, and Zero-Trust access control using Active Directory and Sophos
- Administered Microsoft 365 and Google Workspace, optimizing user access, policy management, and licensing overhead
- Enforced Chrome and Edge browser policies to secure and standardize endpoint user environments globally
- Led infrastructure upgrades and implemented SOPs, collaborating with stakeholders and vendors to align IT operations with business needs

Alfa KPO

Network Engineer

Mumbai, India

July 2024 – August 2025

- Managed and troubleshooted enterprise network infrastructure, achieving **99.9% uptime** and reducing unplanned downtime by 15% through proactive monitoring
- Configured VLANs, IP addressing, and static routing protocols on Cisco and Brocade Layer 3 switches
- Implemented and managed Sophos Firewall and Endpoint Protection, significantly strengthening the organizational security posture
- Administered Active Directory, handling user access, group policies (GPO), and detailed permission structures
- Conducted periodic Vulnerability Assessment and Penetration Testing (VAPT), mitigating critical security risks and generating compliance reports
- Developed 15+ comprehensive network SOPs, improving operational consistency and accelerating troubleshooting workflows

Alfa KPO

IT Executive

Mumbai, India

June 2023 – July 2024

- Provided dedicated technical support for a high-density environment of **1300+ systems**, resolving complex hardware, software, and network issues
- Troubleshooted LAN infrastructure and network bottlenecks using SNMP diagnostic tools (Domotz) and firewall logs
- Monitored server infrastructure, racks, and uplinks to ensure continuous availability and prevent hardware failures
- Configured and supported enterprise email services (Outlook, POP/IMAP/SMTP, Exchange) and managed domain configurations
- Delivered efficient remote support using Zoho Desk, streamlining ticket resolution and improving user satisfaction scores
- Maintained CCTV, DVR, and alarm systems, ensuring strict adherence to organizational physical security protocols

Education

Thakur College of Engineering and Technology

B.E. in Computer Engineering | **CGPI: 7.03**

Mumbai, India

Aug 2016 – July 2021

JSpiders

Java FullStack Development

Bangalore, India

Thakur Vidya Mandir Jr College

HSC in Science

Mumbai, India

May 2014 – Feb 2016

Technical Projects

Enterprise-Grade HomeLab Environment

Self-Hosted

Systems Administrator

- Architected and managed a comprehensive Linux server environment, configuring network routing, switching, and secure SSH access.
- Deployed and maintained multiple self-hosted services including an Apache Web Server, Nextcloud (File Server), and SMB (Windows Network File Manager) for secure data redundancy.
- Configured a localized multimedia streaming server (Jellyfin), optimizing network bandwidth and local QoS for uninterrupted streaming.

Mattermost Chat Application

Open Source

Lead Deployment Engineer

- Deployed and currently maintain Mattermost on a secure Linux server, ensuring encrypted communication and full administrative control over internal user data
- Integrated the application seamlessly with existing IT infrastructure to facilitate secure, intra-organizational collaboration

Custom Password Manager

Self-Hosted

Security Implementation

- Designed and deployed an open-source password manager utilizing advanced encryption techniques (AES-256) to securely store and share authentication credentials
- Ensured strict compliance with organizational security standards and role-based access control

Endless Runner Mobile Game

Unity3D

Game Developer

- Developed and deployed a mobile game utilizing the Unity engine and C#, demonstrating an understanding of application lifecycle management.
- Successfully published to the Google Play Store, handling asset optimization, user experience design, and deployment pipelines.

Inventory Management System

PHP & JavaScript

Developer

- Developed and implemented an asset tracking system to manage hardware assignments and streamline maintenance workflows
- Enhanced overall efficiency in IT asset management by **25%**, significantly reducing hardware loss

Java-Core Programmings

OOP & Architecture

Developer

- Developed a comprehensive series of applications focusing on fundamental Java programming principles
- Applied advanced Object-Oriented Programming (OOP) concepts, demonstrating practical knowledge of method overloading, overriding, inheritance, and polymorphism

Technical Skills

- **Networking:** VLAN, DHCP, DNS, TCP/IP, VPN, QoS, Cisco Switching, Routing, Network Troubleshooting
- **Security:** Sophos Firewall, Endpoint Protection, Access Control, VAPT, Network Security, Security Policies
- **System Administration:** Windows Server, Active Directory, Group Policy, User & Access Management, System Hardening
- **Cloud & Platforms:** AWS EC2, Microsoft 365, Google Workspace, Basic Cloud Networking
- **Monitoring & Tools:** Domotz, Zoho Desk, Network Monitoring Tools, Incident Management
- **Automation & Scripting:** PowerShell, Bash (Basic), Task Automation (Basic)
- **Infrastructure:** Virtualization, Backup & Recovery, VoIP, CCTV Systems, High Availability
- **Operating Systems:** Windows, Linux (Basic Administration)
- **Version Control & Programming:** Git (Basic), Java (Basic), Python (Basic)
- **Languages:** Native: Hindi | Fluent: English | Familiar: French

Certifications & Professional Training

- **AWS Certified Cloud Practitioner** (In Progress) – Focusing on IAM, EC2, VPC, and Cloud Security.
- **Cisco Certified Network Associate (CCNA)** (In Progress) – Emphasizing OSPF, VLAN routing, and network automation.
- **Microsoft Certified: Azure Fundamentals** (Planned)
- **Enterprise Security Training:** Hands-on administration of Sophos XG Firewalls and Zero-Trust implementation.
- **Java FullStack Development Bootcamp:** Comprehensive training at JSpiders covering backend logic and database management.
